

17. Dr. Herman Goldstine asked his wife, Adele, to help with the computer team by doing what?
- documenting new protocols
 - managing the output data
 - calculating response times
 - maintaining the machines
 - recruiting new members
18. ENIAC was completed in the fall of which year?
- 1932
 - 1937
 - 1945
 - 1949
 - 1953
19. Following WWII, many computers were built upon von Neumann's concept of
- a stored program design
 - the document retrieval system
 - automated calculation principles
 - innovation in the public domain
 - predefined calculation metrics
20. Who is MOST associated with high level languages?
- Ada Lovelace
 - Charles Babbage
 - Alan Turing
 - Grace Hopper
 - Jack Kilby
21. IBM gave universities a steep discount on which model in exchange for increased offerings in computer science courses?
- the IBM 701
 - the IBM 400
 - the IBM 702
 - the IBM 007
 - the IBM 650
22. Due to its limited functionality, the "Baby" computer was a test site for the William tube technology and was named after which city where it was built?
- London
 - Berlin
 - Princeton
 - Manchester
 - Los Angeles
